

## Athlete Biological Passport (ABP)

What exactly is the Athlete Biological Passport?

What biomarkers does it monitor?

Why is it considered one of the most effective anti-doping tools available today?

And what should athletes know about how it works?

Answers to these questions and many more will be provided during the next edition of the International Testing Agency's (ITA) educational webinar series, \*Ask the Expert\*.

Participants are encouraged to submit their questions when registering for the webinar.

In addition, dedicated time will be reserved at the end of the webinar for a live Q&A session.

The webinar will be delivered in English with simultaneous interpretation available in four additional languages: Russian / French / Spanish / Arabic.

### Date and Registration:

Date: 30 June 2026

Time: 14:00-15:00 CEST

Registration: [https://us06web.zoom.us/webinar/register/WN\\_feEKCnVTCC42T0CIspzNA#/registration](https://us06web.zoom.us/webinar/register/WN_feEKCnVTCC42T0CIspzNA#/registration)

Participation is free of charge, but advance registration is required.
